<b>Product/Technology</b> Wearable electrocardiogram(ECG), respiratory and accelerometer <b>HEXOSKIN</b>						<b>Company</b> KISSEI COMTEC CO., LTD.		
<b>USP</b> <i>Unique Selling Proposition</i> Just by wearing the shirt, ECG, respiration (two channels, chest and belly) and acceleration can be measured for a long time. The heart rate, respiratory rate, etc. can be calculated from the measured data. Since the sensor is integrated with the shirt, it does not burden the wearer or interfere with the operation of the measurement target.  The shirt is made of a material with excellent elasticity, quick-drying, and breathability, and is deodorant, UV-blocking, and washable. If you have an iOS or Android device, you can also monitor measurement data in near real time via Bluetooth communication.						<b>URL</b> <a href="https://www.kicnet.co.jp">https://www.kicnet.co.jp</a>
