Product/Technology Walking analysis device AYUMIEYE medical						Company KOMS Co., Ltd.		
USP <i>Unique Selling Proposition</i> It's a walking measurement device which has the latest scoring and visualization of walking function from acceleration data during walking using a module equipped with a 3-axis acceleration sensor and an iOS app, which was notified to PDMA in June 2020 in collaboration with Waseda Elderly Health Corporation. Simply attach the module to the waist and walk about 10m to analyze the "propulsion", "balance" and "rhythm" of walking and visualize "walking". The measurement results can be conveyed in an easy-to-understand manner without relying on specialized knowledge. The operation is also extremely easy.						URL https://www.koms.co.jp/
